

Accu-Chart®

AccuPrint™ 600X

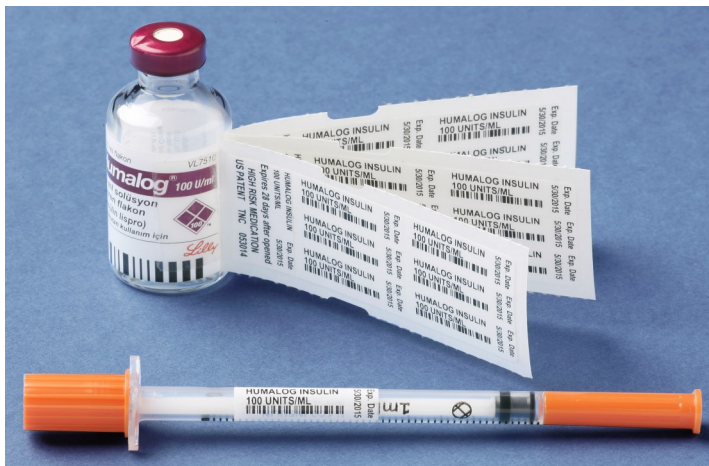

AccuPrint™ 600X

Thermal Transfer auxiliary label printer. **600 dpi print resolution**. USB and Ethernet connection. Center justified printing. 6 inches/second print speed, 4.16 inch print width, on the fly formatting. Includes barcode label design software with report capability, online installation and training, and a **2-year warranty**. 10.0" W x 11.3" H x 18.0" D. 22 lbs.

Multi-Flag™ Label

The **Multi-Flag™ Label** (U.S. Patent) by Accu-Chart™ is designed to identify a multidose container, and the medication being taken from the multidose container. The major advantage is that the medication being removed from the multidose container can be immediately identified with the miniature label applied to the syringe or other container for the medication. This method gives you the drug name and the barcode **"to the bedside"** to prevent medication errors.

Multi-Flag™ Label

Several **Multi-Flag™ Label** (U.S. Patent) can be applied to the original container so that the nurse has sufficient miniature labels for applications to the syringes or other containers which will be taken **"to the bedside"** for administration. This positive identification method is a vital step in solving the problem of unidentified medications in hospital, nursing home, or other medication dispensing settings.

Accu-Chart Flag Labels

There are several sizes of the AccuPrint Flag Labels, with printing on both sides of the label. These unique labels are of high quality, rigid material, with the adhesive being a clear material so that important information on the item is not covered by the label. These flag labels, including the Multi-Flag, are available in various COLORS as well (yellow, red, blue, green, etc.). Many other non-flag labels of various sizes are also available.
