

VersaFlow

Compounding Aseptic Isolator
USP <797> Compliant

ACCU-CHART®

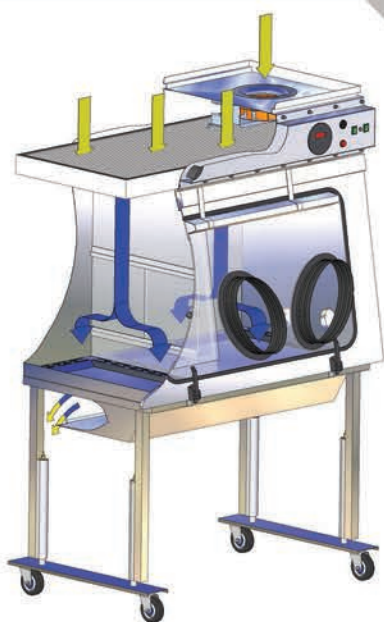

Accurate Medicine Through Barcodes

The most practical, versatile solution for sterile compounding and USP <797> compliance in the hospital pharmacy and cleanroom.

Germfree's VersaFlow™ is a Laminar Flow Compounding Aseptic Isolator. The VersaFlow provides the most practical and versatile solution for I.V. compounding in the hospital pharmacy and cleanroom. The VersaFlow operates under positive pressure, functioning as a Compounding Aseptic Isolator (CAI) to meet USP <797> regulations. The complete work area and transfer chamber is bathed by HEPA-filtered air, protecting the product from contamination.

Compliant

Overall Dimensions:

VF-4USP: 64" wide x 32" deep x 79½" high

VF-6USP: 88" wide x 32" deep x 79½" high

VF-64PUSP: 92" wide x 32" deep x 79½" high

Work Area Dimensions:

VF-4USP: 33" wide x 27½" deep x 32" high

VF-6USP: 49" wide x 27½" deep x 32" high

VF-64PUSP: 55" wide x 27½" deep x 32" high

Antechamber:

VF-4USP: 14" wide x 27½" deep x 32" high

VF-6USP: 22" wide x 27½" deep x 32" high

VF-64PUSP: 19½" wide x 27½" deep x 32" high

External Fluorescent Lighting

1" Stainless Steel Adjustable I.V. Bar
with Hooks

Anthropometrically Correct Gloveports with
3" Armrest for Increased Range of Motion

Cleanroom Grade Locking Casters

Cleanroom-Compliant Prefilter increases the
life of the front loading HEPA Filter while
reducing particulates inside the cleanroom

Conforms to ANSI/UL STD 61010-1
Certified to CAN/CSA C22.2 STD NO. 61010-1
