

Accu-Chart®

Various Workstations

Basic Workstation: The basic workstation is able to support any classic & vantage cadet in addition to a flat screen monitor. The workstation is also capable of storing the AccuPrint-600, computer tower and supplies below the Cadet. This hospital had a very small pharmacy packaging area which is why they put the AccuPrint-600, computer tower and supplies in this area. The dimensions are 24" front to back, 48" left to right, and 30" tall.

Monitor Option: There is an option for the Monitor Support Arm for a flat screen monitor. If you order a Vantage Cadet® Twin 2x2, you will need to purchase Monitor Support Arm to put the flat screen monitor on the right side. This will avoid having the computer and the computer monitor on a nearby counter. The Keyboard Shelf shown is included in the purchase.

Wire Frame Option: The wire frame is capable of supporting our cadets along with additional storage at a lower cost. The wire frame carts come with three shelves 62" long x 24" wide.
